

3.4. Oracle jet form with submit button and display data

Introduction: This practice adds submission functionality to your progressive form. Once users fill out all fields, they can:

- Click a **Submit** button.
- See the submitted values printed as a JSON block right below the form.

All data collected using observables is captured and displayed using `ko.observable()` and `ko.observableArray()`.

Pre-requisites

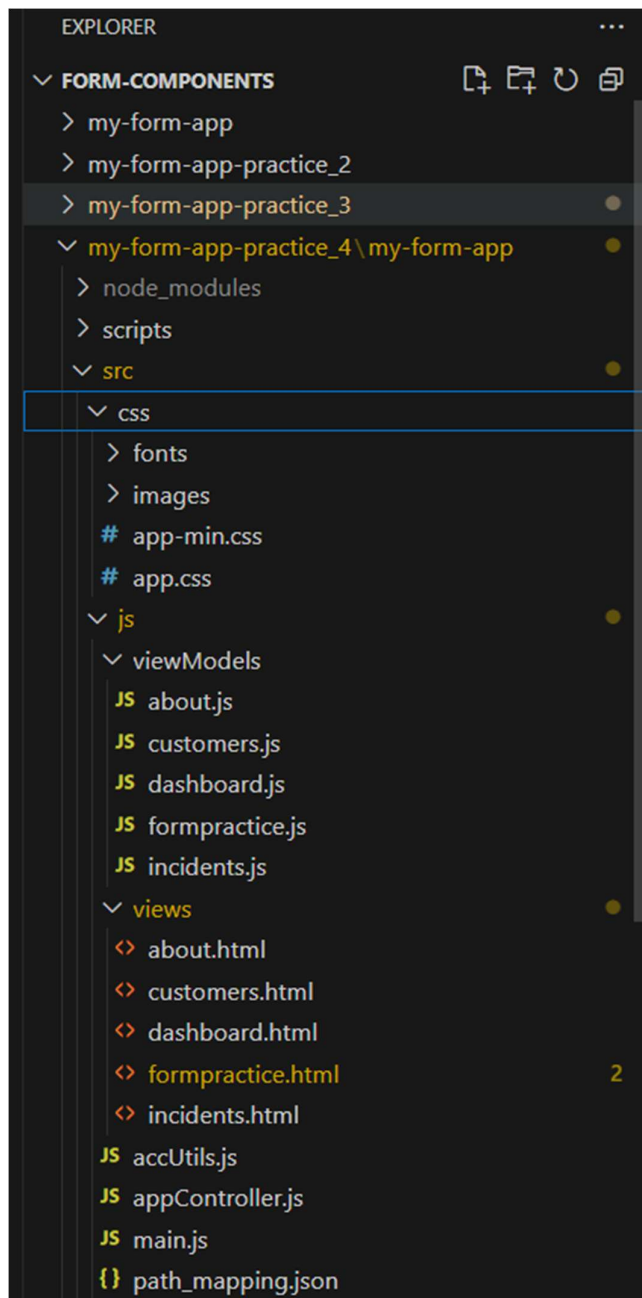

Ensure all the following are complete:

- Practice 1: Name and Email fields
- Practice 2: Country dropdown with `oj-select-single`
- Practice 3: Gender (`oj-radioset`) and Hobbies (`oj-checkboxset`)
- You are working in a JET app (e.g., `NavDrawer` template)

Learning Objectives

- Add a button to submit form data.
- Use Knockout observables to capture values.
- Dynamically render submitted JSON below the form using `data-bind`.

Project structure:

Step-by-Step Implementation

1. Create a new folder named "my-form-app-practice_4" and move to that directory
2. In the command line run,
Ojet create my-form-app --template=navdrawer
3. Then run **ojet build web** and **ojet serve** respectively (like we did before)

4. Create folders /js/viewModels/formpractice.js and /js/views/formpractice.html
5. Add code to formpractice.js

```
JS formpractice.js x
my-form-app-practice_4 > my-form-app > src > js > viewModels > JS formpractice.js > define() callback
1  define(['ojs/ojcore', 'knockout', 'ojs/ojarraydataprovider', 'ojs/ojformlayout',
2    'ojs/ojinputtext', 'ojs/ojselectsingle', 'ojs/ojradio', 'ojs/ojcheckbox',
3    'ojs/ojcheckboxset', 'ojs/ojbutton'],
4    function (oj, ko, ArrayDataProvider) {
5
6      function FormPracticeViewModel() {
7        this.name = ko.observable('');
8        this.email = ko.observable('');
9        this.selectedCountry = ko.observable('');
10       this.gender = ko.observable('');
11       this.hobbies = ko.observableArray([]);
12
13       // Dropdown options
14       this.countryOptions = [
15         { value: 'IN', label: 'India' },
16         { value: 'US', label: 'USA' },
17         { value: 'UK', label: 'UK' }
18       ];
19       this.countryDataProvider = new ArrayDataProvider(this.countryOptions, { keyAttributes: 'value' });
20
21       // Radio button options
22       this.genderOptions = [
23         { value: 'male', label: 'Male' },
24         { value: 'female', label: 'Female' },
25         { value: 'other', label: 'Other' }
26       ];
27
28       // Checkbox options
29       this.hobbyOptions = [
30         { value: 'reading', label: 'Reading' },
31         { value: 'sports', label: 'Sports' },
32         { value: 'music', label: 'Music' }
33       ];
34
```

```
35       // Submission observables
36       this.formSubmitted = ko.observable(false);
37       this.submittedData = ko.observable({});
38
39       // Submit handler
40       this.handleSubmit = () => {
41         const data = {
42           name: this.name(),
43           email: this.email(),
44           country: this.selectedCountry(),
45           gender: this.gender(),
46           hobbies: this.hobbies()
47         };
48         console.log("Form submitted:", data);
49         this.submittedData(data);
50         this.formSubmitted(true);
51       };
52     }
53
54     return FormPracticeViewModel;
55   }
56 );
57
```

4. Now add following code to formpractice.html file

```
<> formpractice.html 2 X
my-form-app-practice_4 > my-form-app > src > js > views > <> formpractice.html >
1  <div class="oj-panel">
2  <div id="form-container">
3      <oj-form-layout max-columns="3"
4          direction="row"
5          class="oj-formlayout-full-width"
6          user-assistance-density="compact">
7
8      <!-- Practice 1 -->
9      <oj-input-text id="nameInput"
10         value="{{name}}"
11         label-hint="Enter name"
12         required="true"
13         user-assistance-density="compact">
14     </oj-input-text>
15
16     <oj-input-text id="emailInput"
17         value="{{email}}"
18         label-hint="Enter email"
19         required="true"
20         user-assistance-density="compact">
21     </oj-input-text>
22
23     <!-- Practice 2 -->
24     <oj-select-single id="countrySelect"
25         label-hint="Select Country"
26         data="[[countryDataProvider]]"
27         item-text="label"
28         value="{{selectedCountry}}"
29         required="true"
30         user-assistance-density="compact">
31     </oj-select-single>
32
```

```

33 <!-- Practice 3 -->
34 <oj-radioset label-hint="Gender"
35 value="{{gender}}"
36 required="true"
37 user-assistance-density="compact">
38 <oj-option value="male">Male</oj-option>
39 <oj-option value="female">Female</oj-option>
40 <oj-option value="other">Other</oj-option>
41 </oj-radioset>
42
43 <oj-checkboxset label-hint="Hobbies"
44 value="{{hobbies}}"
45 user-assistance-density="compact">
46 <oj-option value="reading">Reading</oj-option>
47 <oj-option value="sports">Sports</oj-option>
48 <oj-option value="music">Music</oj-option>
49 </oj-checkboxset>
50 </oj-form-layout>
51
52 <!-- Practice 5: Submit Button -->
53 <div class="oj-flex oj-sm-justify-content-center oj-sm-margin-top-4">
54 <oj-button on-oj-action="[[handleSubmit]]">
55 Submit
56 </oj-button>
57 </div>
58
59 <!-- Display Submitted Data -->
60 <div class="oj-sm-margin-top-4" data-bind="if: formSubmitted">
61 <h3>Submitted Data</h3>
62 <pre data-bind="text: JSON.stringify(submittedData(), null, 2)"></pre>
63 </div>
64 </div>
65 </div>

```

7. Run ojet serve on command terminal
8. Navigate to the Form Practice page in the browse.
9. Enter Name, Email, and select a Country, hobbies and gender, submit the data and notice displayed data on screen

Enter name *
demo

Enter email *
demo@gmail.com

Select Country *
India

Gender *

☐ Male

☒ Female

☐ Other

Hobbies

☒ Reading

☒ Sports

☐ Music

Submit

Submitted Data

```
{
  "name": "demo",
  "email": "demo@gmail.com",
  "country": "IN",
  "gender": "female",
  "hobbies": [
    "reading",
    "sports"
  ]
}
```
